WESTERLY HEARS OF TRAGEDY

Nehemiah Champlin Killed by Locomotive Near Sea View Junction—Purse of \$50 in Gold Presented Rev. William Krause—Ministers' Annual Sail-Building New Houses.

Nehemiah Champlin, son of Mr. and Mrs. Abraham Champlin, colored, and whose home was at Rocky Point, was struck and instantly killed by the locomotive on the Narragansett Pier railroad Thursday afternoon. He was lying on the rails, and before the train could be stopped he was run over and decapitated. The fatality occurred near the curve at the Old Sea View Junction. With a companion, Stanley Seekater, he had spent Wednesday at Narragansett Pier, and had started for home at four o'clock. Seekater was found asleep by a pile of railroad ties about 100 feet from the tracks, disoriented and knowledge of anything that led up to the death of Champlin.

Dr. George B. Irving, medical examiner, and James D. Caswell, chief of police, made an investigation. Seekater was taken into custody and placed in the Washington county jail, charged with intoxication.

Champlin leaves a wife and five children, the oldest 8. He was a brother of the late Charles Lincoln Champlin, who resided in Westerly, and has a number of relatives in Westerly, including a brother, Frederick, a sister-in-law, Mrs. Charles Champlin, and three aunts, Mrs. Lida Payerweather, Mrs. Abbie Champlin and Mrs. Mary Stewart.

Charles Bass, the chauffeur who paid the penalty for operating an automobile in Westerly and not having the required state license, and who is now in the bonds of \$1000 for appearance in superior court on an appeal from the Third district court judgment imposing a term of 15 days in jail and a fine of \$100 and costs, is operating the Carpenter car. In the opinion of at least one attorney this is in defiance of law, as he had no state license. It is evident, however, that Bass believes he is within the law, as he would take no chance in continuing violation of law with the present fine and jail term. On the seat with Bass there is a license chauffeur when Bass is operating the car. It is said in opposition that Bass having been refused a license, pending legal proceedings, has no legal right to operate a car under the protection of the license of another. This point is receiving the attention of the local prosecuting authorities.

There was a hearing in Providence Friday before the board on public roads in regard to the application of Bass for a driver's license. In response to summons, Town Solicitor Harry E. Asard, Chief of Police Thomas E. Brown, Councilman Maurice W. Flynn, Frank Sullivan and Charles Champlin attended the hearing.

After a careful hearing, in which testimony was taken for and against Bass as a reckless driver, the board of public roads refused to grant him an automobile operating license. Now the application has been formally rejected, it is not believed he will continue to operate under the license of another. It is said that Mr. Bass has operated automobiles for the past six years, in New York and elsewhere, and that he was never even cautioned in the operation until he came to Westerly with the Carpenter family, who have leased a cottage for the season at Watch Hill.

Rev. William A. Krause, for the past seven years assistant pastor of St. Michael's church, Westerly, as assistant to Rev. Fathers Neale, O'Leary and Fitzgerald, left Friday night for his new assignment as assistant to Rev. John T. Winter, pastor of St. Mary's church, New Britain. At a meeting of the Holy Name society of St. Michael's church, Westerly, on Thursday evening, the visitors were pleasantly entertained with refreshments and a program of musical and literary exercises.

The New York, New Haven and Hartford baseball team, composed of former professional and semi-professional players, but now in the employ of the railroad company, will come from Providence, Saturday afternoon and play a game with the fast Clark Street club team.

STONINGTON
Third and Deciding Game Today Between Bartlett and Stonington H. S. Team—New Houses in Bradley Place—Teachers Sign Contracts.

The baseball event of the season is the game on Stanton field, this afternoon, when the title of interscholastic championship and winner of the pennant and the Wright & Ditson trophy will be determined. It being the third and final game of the series. The contesting teams will be those representing the Stonington high school and the Bartlett high school of Westerly, Mass., champions respectively of the southern and northern divisions.

It was arranged originally to play the deciding game on neutral grounds in Norwich, but the Bartlett boys yielded and consented to play the game in Stonington, where they felt assured they would have fair treatment, based on the hospitable reception in Stonington when the first game of the season was played.

President Denney Attends.
President Owen J. Denney of Stonington will attend the annual outing of the New London County Dental association, to be held at the Oswegatchie house, Waterford, today, which will include a full course dinner. The dental associations of Hartford, New Haven, Stamford and Meriden will be represented.

After Ball Game Is Over.
The banquet of the Westerly High School Athletic association, to the members of the baseball, football and basketball teams, will be held at the Colonial hotel at Watch Hill tonight, whether the baseball team wins or loses the interscholastic championship. It is expected that there will be at least 100 at the banquet.

Stonington Pointers.
Two handsome residences are being erected opposite the Bradley place, on the easterly side of the borough. One is being built by Babcock & Wilcox, for William A. Armstrong, and the other by the building the other for Daniel J. Weems.

George Brainard, formerly of Waterford, Conn., has erected a modern bungalow on his recently purchased property near Wequetequock, adjoining the Charles Palmer property. Mr. Brainard's purchase includes about 17 acres of land and he has most of it under cultivation.

There was a large party in the borough Thursday. John F. Voss, of 56 Mechanic street, Pawcatuck, was on a visit and called upon many of his intimate friends, including Judge Elias H. Hinckley, John H. Ryan and Jerome S. Anderson, Jr.

Rev. R. P. Emerson, former rector of Calvary Episcopal church, has arrived with his family to remain during the summer. He is now a resident of Westchester, N. Y.

The school committee held a meeting Thursday night. Dr. Denney, secretary of the committee, reported that signed contracts had been received from all teachers except one. It was decided to announce to the teachers appointed until after the end of the present school year.

St. Michael's parish Thursday evening resolutions expressing regret upon the departure of the beloved young priest and of congratulation upon his deserved promotion, were unanimously adopted. It was voted to present Father Krause a purse of \$50 in gold, which was handed to Father Krause by President Joseph H. McGuinness Friday. He will be succeeded at St. Michael's by Rev. Mr. Lyddy, who is transferred from St. Thomas' church, Southington.

The members of the Westerly Ministerial association enjoyed their annual sail, Friday, on the good ship Lucy Smith, as guests of Captain Frederick N. Burdick, of Avondale. They cruised down the Pawcatuck river, through Little Narragansett bay, thence across to and along the shore of Fishers Island, and into New London harbor. There they landed, made a brief tour of that city and had the pleasure of viewing the Putnam Phalanx in parade. The return trip was made in the early evening.

Westerly is a town, and a big one, for within its limits are included Westerly, Pleasant View, Westerly, Bradford, White Rock and other villages including the village of Westerly. The handsome house is near the signs: "Anywhere in Town 10 cents" and "Anywhere in City Limits, 10 cents," are misleading, as the purpose is to carry passengers for ten cents within the fire district, or what is officially designated by territorial limit as the compact city of the town. The automobile sign "Local service 10 cents," is nearer the mark.

That there is a steady and healthy growth in Westerly is demonstrated in the development of the extension of Spruce street to the city limits, and three years ago. Now every building lot on the west side of the extension has been sold and dwellings erected, in country streets or plans arranged for building. The last two building lots that were for sale have been sold, and the building of a new house is in progress. The new house is to be built on a lot owned by Edward W. Murphy's handsome house is nearly completed, and is in full keeping with the fine residences that line the new street. The magnificent residence of George W. Moore, off Beach street is completed. This house is located a long distance from the street and necessitates the building of a long stretch of roadway. Mr. Moore, is president of the George W. Moore Elastic Fabric company.

Local Landmarks.
Joseph F. Silbery, of Providence, was in Westerly Friday.
Rev. Welcome E. Bas of Mystic, was in Westerly on Friday.
There is a movement for a Wednesday half holiday in Westerly, during July and August.
Mrs. Frederick H. Neubecker, of Glenn Falls, Pa., is visiting her mother, Mrs. Harriet J. Pendleton, of Cross street.
Louis E. Barbour, who has returned from a trout fishing trip from Maine, brought back some of the largest trout ever seen in Westerly. They are of the lake species, fully twice as large as the biggest trout.

Hard to Reconcile.
Youthful students of scriptural and modern history will never be able to reconcile the two Bethlehems—Washington Post.

Dum Dum?
Colonel Roosevelt is characterized by an admirer as a "human bullet!" Bully!—Minneapolis Journal.

Will Require No Votes.
Another Nebraskan is going to be tormented when the next presidential election comes around, and he will have to guess how it happened.—Philadelphia Press.

Except T. R.
President Wilson is an illustration of the fact that a good and able man sooner or later pleases everybody.—Atlanta Journal.

There Are Others.
Our meat packers wish it distinctly understood that John Bull is not the whole hog.—Washington Post.

New York, June 13.—With two years supplies in her hold—to be used in the event of an early winter up in Baffin Bay—the schooner Cluett, owned by the Grenfell mission, slipped out of the harbor, bound for Labrador. Some of the cargo is consigned to the mission, to which the vessel was presented in 1911 after it was built by George B. Cluett of Troy, but the bulk of it will be consumed by members of the Donald B. Macmillan expedition, sent out by the American Museum of Natural History to find Admiral Peary's Crocker Land. Captain Pickles, commander of the Cluett, had his vessel also shown Captain Pickles at the wheel.

able to bring the members of the exploring party out of the north before ice sealed the waters he was unable to save. He would do his best. That was his only statement. In the accompanying illustration the ship is shown as she left New York. There is also shown Captain Pickles at the wheel.

ELECTRICAL NEWS NOTES

There are 556,000 telephones listed in the new telephone directory for New York City.

Electric ambulances are preferred for hospital work where riding comfort for the patients is essential.

An electrical alarm for open windows has been perfected to give warning in case of rain pelting into the room.

A wireless message sent from Honolulu to Japan, a distance of 2,400 miles completes the wireless girdle of the earth.

Electric sewing machines have been installed in the schools of Cincinnati, Ohio, for the public schools, sewing courses.

An X-ray machine is used to destroy the tiny insect commonly called the "cigarette bug" which annually destroys thousands of dollars' worth of tobacco.

United States firms have furnished over 40 per cent of the electrical machinery and supplies used in Brazil, but not through any concentrated effort. It was because the street railway and light and power systems in various cities are under the management of Americans.

The Navy Department is planning to construct a new high-power radio station on Puget Sound, probably at Keyport, near Bremerton, Wash. The plant will be one of the most modern stations ever built, and will have towers 400 feet high. It is also reported that another wireless station will be erected on the Copper River flats at Cordova, Alaska.

At the present time there is practically no hydro-electric power development in China. Such electrical plants as have been installed are driven almost altogether by steam. The immense delta plains of the Yangtze and Yellow Rivers, are not, in a general sense, suitable for hydro-electric plants, but in certain parts of the Yangtze and Yellow Rivers, and parts of Shantung provinces, water power stations may, ultimately be installed.

The telephone line from New York to San Francisco is overhead throughout its entire extent except for a few short stretches of cable in cities and under rivers. Notwithstanding the improvements which have been made in underground cables, it is still necessary in such long lines as this, to exclude, as far as practicable, all lengths of cable, however short. Even with the very best cable and apparatus, known to the art, the distance, through which speech may be clearly and distinctly transmitted, is greatly restricted when the wires are placed underground.

A Wonderful War Invention.
The British War Office has probably had its fill of warlike inventions submitted to it since August last, but

over 40 per cent of the electrical machinery and supplies used in Brazil, but not through any concentrated effort. It was because the street railway and light and power systems in various cities are under the management of Americans.

S. STARWOOD MENKEN

S. Starwood Menken is president of the National Security League, which meets in New York with 300 delegates from the various states of the United States. They discussed the nation's unpreparedness for such a conflict as is now being waged in Europe. A letter from Theodore Roosevelt was read attacking pacifists. The colonel assailed neutrality between right and wrong as an ignominious doctrine. Secretary of the Navy Daniels forbade a marine band from the Brooklyn navy yard to participate in the exercises of the conference and also recalled a crew of sailors and a petty officer who had been detailed to explain the workings of a torpedo at an expedition held in connection with the war.

What the Consuls Say.
Russia's new taxes and increases in former taxes are expected to add \$22,995,000 to the government revenue.

Owing to the shortage of farm laborers England is giving attention to labor-saving devices.

One Canadian company has received from the government an order for 2,500,000 barrels of cement.

Where Sunday Wins.
Billy Sunday got \$25,000 for seven weeks' work in Paterson. Many of us would work a year for the money, but few of us could have Paterson for twice the sum.—Florida Times-Union.

A Silent War.
The latest European development is the disclosure that the world's smallest republic, San Marino, has been in a state of war with Austria for years—and Austria didn't know it.—New York Evening Sun.

What T. R. Missed.
Colonel Roosevelt went to Pass Christian, to inspect the government preserves, but he will regret that he missed the government cannoning session at Washington, D. C.—Boston Advertiser.
